

DOOMADGEE Queensland

With a population of around 1052 people, Doomadgee is one of the larger isolated communities serviced by our client, Ergon Energy.

This 264kW solar farm is expected to save around 115,000 litres of diesel each year for power generation to the local diesel grid.

This project will also assist with reliability of supply during extended wet seasons when the community can be cut off from fuel supplies for up to six months.

Technical Specifications

Peak Capacity	264 kW
ROI	8 Years
Panels	1056 Trina 250W
Generator Area	3150 sqm
Mounting	Cleenergy Solar Terrace III

Krinner Earth Screws - efficient, cost effective & concrete free installation (350 in total)
